Control Panel

Manaras-Opera Special Custom Industrial Panels

Manaras-Opera is pleased to advise that their Special Custom Industrial Control Panels are certified by CSA.

The panels will be CSA marked to the USA UL standards **50, 508, 508A** and to the Canadian CSA standards **C22.2/0, 0.4, 14, 94**.

New C-CSA-US Standards

- Manaras-Opera complies with the new CSA traceability requirements when building and testing panel assemblies.
- Document archiving and maintenance are required for each special industrial panel built; production order, bill of material, electrical drawing, layout, pictures, checklist, etc.
- These standards require that Manaras-Opera incorporates a fuse protection on the primary side of the transformer in order to protect it's integrity.
- CSA performs regular unannounced inspections of Manaras-Opera in order to verify their compliance with the new standards.
