Manaras-Opera Presents The Next Generation of Control Board

Manaras-Opera is pleased to announce the product launch of its latest Electronic Control Board: **BOARD 070**. It's the natural evolution from the extremely successful and reliable **BOARD 060**.

BOARD 070 provides the same key functions that you've come to expect from **BOARD 060**, plus several enhancements.

Features of BOARD 070

- Improved readability of rotary selection switch dial.
- Increased diagnostic LED feedback.
- New independent loop input terminal.
- Next generation optional radio receiver plug-in.
- Extra auxiliary terminal (contact factory for further details).
- Design improves robustness for adverse field conditions.
- Ready to receive optional universal auxiliary output module (a.k.a. Warning Light Module).
- Timer-to-close can be activated/deactivated by the user from floor level using the 3-button station.
- Possible to use a single-channel transmitter as a Commercial application and as well as Single Button Radio Control (SBC).
- Improved access to power and control terminal strips.
- Motor direction re-wiring in seconds.
- Meets CAN / CSA 22.2-247 safety standards.
- Upon request, compliance to ANSI / UL325 safety standards are available.
- Plus many more...

The phasing-in/out process will begin in early fall 2010.
