Manaras-Opera Offers a Bird Nest Protection Kit

Manaras-Opera is pleased to announce that they have developed a modification kit - **MOD148/MODKIT148** - which includes a guard which prevents birds from nesting within the internal reduction of their trolley operators.

Product Details

- The guard has specifically been designed for the agricultural industry where bird nesting within the operator's internal reduction system can sometimes be a nuisance.
- The modification is compatible with the trolley and sliding door operator models: OTH, OTBH and OSL.
- The upgrade can be factory installed (**MOD148**) or can easily retrofit operators in the field (**MODKIT148**) by following a few quick steps.
- Benefits of using the bird nesting guard:
 - Reduction of bird waste on the operator therefore reducing clean-up time.
 - Reduction in the maintenance of the operator.
 - Prevents potential damage to the operator therefore reducing repair and spare parts replacement costs.
 - Increases reliability of the operator.
 - Increases life time of the operator without harming the birds.
