Manaras-Opera Offers a Solenoid Brake Retrofit Kit

Responding to your needs, Manaras-Opera is pleased to announce that it has developed a retrofit solenoid brake kit for the complete voltage range of Opera-J type operators.

Details

- The retrofit kit **MODKIT 111** was developed for solenoid brake installations in the field, exclusively for OPJ models 115V, 208/230V, 460V and 575V.
- The kit is pre-assembled and shipped in a bag, along with an easy-to-follow instruction sheet.
- A solenoid brake is recommended for the OPJ when being used for high-speed door applications (>10"/sec).

Also Available

- The solenoid brake option **MOD 111**, can also be factory-installed on new OPJ builds.

Pricing

- Please consult the inside sales department for pricing.

This kit is available as of April 2009.
For further information, please contact your Manaras-Opera sales representative.
