MGH, MGT and MGSL Get “OPERAtized”

Operatized MGH model ▶▶▶

Manaras-Opera Presents The Latest “Operatized” Models

Manaras-Opera is pleased to announce that the **MGH**, **MGT** and **MGSL** models are next in line to be “**OPERAtized**” and will be backed by the **OPERA™** philosophy.

The well-known **OPERA™** brand of Commercial Door OPERATORS has become synonymous with innovation and reliability. This philosophy will be carried over to these three models.

Features

- A brighter and larger yellow control box has been used; providing additional room to maneuver when adjustments are required.
- Implementation of the Opera limit system with the patented **Accu-cam®** feature, which allows for precise and quick one-handed limit adjustments.
- Secure industrial control box with simple slide-off cover. To keep the cover closed and secure, simply lock and tighten the four (4) screws.
- Eye-pleasing aesthetic green and yellow design. Baked-on long lasting enamel finish.
- Integration of the Opera disconnect mechanism, including a new metal handle which facilitates the activation of the mechanism (**MGH** model).
- Codification remains unchanged; MGH, MGT, MGSL.
- The introduction will begin with units built with an electronic control board (**BOARD 070**). Hardwired units to follow soon!

The phasing-in/out process will begin in early 2011.
